## Testimonials

I want to stop and take the time to brag on my new waterers I bought from Texas Superior Animal Waterers designed by Fred Bray. Our barn has 48 automatic waters that I have had to change out repeatedly for rusting through especially at the bottom. When I first saw Texas Superior Animal Waterer I knew I wanted to give them a try. They were professionally crafted, larger than the other brand so they held more water. There is a valve you can turn on the bottom that allows you to clean them thoroughly so you don't have to scoop your hand in dirty water. Best of all they are made of stainless steel and will outlast the other off brands by a long time. They also hang on the wall more level and straight. Being a horseman Fred's experience allowed him the knowledge to design and produce a quality product with the horse and customer in mind. Since then I've purchased about 15 more and I'm not done yet. Great job! ~ Robin Forrest.- Cherry Creek Arena, Mont Belvieu, TX

Sending a big thank you to our friends at Texas Superior Animal Waterers. These waterers are wonderful; no more leaks, rust or constant replacing of waterers. Not only are they easy to clean but almost indestructible and we all know a stalled horse will try. We received and installed our first two waterers earlier this year and have been very pleased and we are now installing 3 more! Thanks TSAW for your help in keeping our horses healthy with clean, fresh water and reducing chore time by making the cleaning so fast and easy.

~SIRE Therapeutic Horsemanship, Richmond, TX

I have 4 units in my stalls and they are the best waterers that I have ever used. They are very easy to clean and it only takes a matter of seconds. I highly recommend these waterers to everybody that I come in contact with that has horses.

~Justin A. – Boling, TX

I am not only a retailer of Texas Superior Animal Waterers but I am also a user, I have them installed in my barn. These automatic waterers are the best ones that I have ever seen. I think they are better than a top of the line brand that retails for about twice the price. These units are durable and made of quality stainless steel that should last a lifetime. My customers that have purchased these are all pleased, not a single complaint. This is definitely a quality product. Come give me a visit and I will give you a demonstration.

~L. Allen, Allen's Western Wear & Saddlery, Pasadena, TX

I am writing this letter to tell you how pleased I am with your automatic waterers. I installed several in horse stalls and I am very satisfied. They fill fast, are durable and easy to clean. Best of all, they are virtually indestructible. I put one in the stall of a show steer that had a bad habit of destroying every watering device we provided him. After several months the automatic waterer looks as good as new and works perfectly. Thanks for a great product.

~Russell K. - Anchor K Ranch - Raymondville, TX

For the past several years we used another brand of waterer but continually experienced leakage, rusting and general deterioration. After seeing the Texas Superior Animal Waterer, we purchased six units. We placed 4 units in our barn and 2 in turn-out paddocks. Since installation there has been absolutely no maintenance. We have observed that when our horses are turned out, they actually prefer drinking the fresh water from the Texas Superior Animal Waterer in lieu of the water trough. We cannot say enough good things about these units. They are the best value for the money and we highly recommend them to anyone in the horse industry.

~John and Sandy B. - Brookshire, TX

These automatic waterers are durable and hold up very well to the day-to-day use of horses and they won't fall apart. We received our first waterer in January 2017 and we have not had one maintenance issue with them at all. The ones we use have flow meters and that helps keep track of just how much water your horse is drinking. This is very important in keeping your horse healthy and maintained while in training, especially if it's hot. It is also important during cold winter months when they tend to drink less or even when one is sick. The flow meter is extremely helpful. You can't go wrong with these waterers. They are strong, maintenance free and long lasting. Well worth the money.

~David and Stacy S. - Cooper, TX

Since installing my waterer I have not experienced the maintenance issues, especially with the floats as I did with the others that I previously had. These don't let the water spill and make a mess in the horses stall. Therefore my stable hand has less clean up to do and he likes that. I highly recommend these waterers to anyone that keeps their horses stabled.

*~Joe S. - Waller, TX*

I recently installed a Texas Superior Animal Waterer in the barn and I LOVE it! No more dragging out the hose and scrubbing buckets and the best thing is – my horses have clean, fresh water all the time. Thanks Texas Superior Animal Waterer for designing such a cool automatic waterer.
