Digital Flow Meter # 16106

The Digital Flow Meter will automatically turn on when there is water flowing through the sensor. It will automatically turn off in 10 seconds when the water stops flowing.

The default display is the total measuring volume. This volume is measured in gallons. The amount is in total number of gallons and will continue to count the volume and retain it until the unit is manually reset.

When the battery power is lower than the required level, the unit will generate an audible alert and blink on the display screen. Once the batteries are replaced the alert will be released. The data will be retained in memory and restored when the batteries (2 AAA) are replaced.

Accuracy is +/- 10%

Horizontal mounting for best results

<u>Part No.</u>	<u>Quantity</u>	<u>Description</u>	<u>Retail</u>
#16106	1	3/8" FPT x 3/8" FPT Digital Flow Meter	\$65.63
